Volume 212 March 1990

CONTENTS

Preface *page* ix

Early days of turbulence research in Cambridge. A. A. Townsend 1

GKB and Euromech. David G. Crighton 7

Hydrodynamics of the rupture of thin liquid films. A. B. Pandit and J. F. Davidson 11

The bifurcation of liquid bridges. D. H. Peregrine, G. Shoker and A. Symon 25

Wave formation on a liquid layer for de-icing airplane wings. Chia-Shun Yih 41

Dynamics of wetting: local contact angles. P. G. de Gennes, X. Hua and P. Levinson 55

Self-propulsion of asymmetrically vibrating bubbles. T. Brooke Benjamin and Albert T. Ellis 65

The electroacoustic equations for a colloidal suspension. R. W. O'Brien 81

Particle migration in suspensions by thermocapillary or electrophoretic motion. A. Acrivos, D. J. Jeffrey and D. A. Saville 95

Concentration waves in dilute bubble/liquid mixtures. L. van Wijngaarden and C. Kapteyn 111

Sedimentation and sediment flow on inclined surfaces. A. Nir and A. Acrivos 139

A new continuum model for suspensions of gyrotactic microorganisms. T. J. Pedley and J. O. Kessler 155

Biofluiddynamics of balistiform and gymnotiform locomotion. Part 1. Biological background, and analysis by elongated-body theory. James Lighthill and Robert Blake 183

The fluid mechanics of solidification. Herbert E. Huppert 209

Hydrodynamic interactions in directional solidification. Stephen H. Davis 241

Flow-controlled reactions in rock fabrics. O. M. Phillips 263

Stability of an acid front moving through porous rock. E. J. Hinch and B. S. Bhatt 279

Extended Stokes series: laminar flow through a heated horizontal pipe. Milton Van Dyke 289

Emptying filling boxes: the fluid mechanics of natural ventilation. P. F. Linden, G. F. Lane-Serff and D. A. Smeed 309

On a class of steady confined Stokes flows with chaotic streamlines. K. Bajer and H. K. Moffatt 337

Wave motion in a viscous fluid of variable depth. John Miles 365

Nonlinear dynamics of two-mode interactions in parametric excitation of surface waves. T. Kambe and M. Umeki 373

A model of vortex reconnection. P. G. Saffman 395

Dissipative wave-mean interactions and the transport of vorticity or potential vorticity. M. E. McIntyre and W. A. Norton 403

Stability of the laminar flow in a rectangular duct. Tomomasa Tatsumi and Takahiro Yoshimura 437

On transition to chaos in two-dimensional channel flow symmetrically driven by accelerating walls. E. E. B. Watson, W. H. H. Banks, M. B. Zaturska and P. G. Drazin 451

On a model of laminar–turbulent transition. G. I. Barenblatt 487

Rapid distortion theory and the 'problems' of turbulence. J. C. R. Hunt and D. J. Carruthers 497

A simple and unifying physical interpretation of scalar fluctuation measurements from many turbulent shear flows. P. C. Chatwin and Paul J. Sullivan 533

Turbulent fountains in an open chamber. W. D. Baines, J. S. Turner and I. H. Campbell 557

On sublayer streaks. M. T. Landahl 593

An experimental investigation of an incompressible turbulent boundary layer in the vicinity of separation. P. Dengel and H. H. Fernholz 615

Mean fields and fluctuation moments in unstably stratified turbulent boundary layers. B. A. Kader and A. M. Yaglom 637

Temperature overshoot due to quantum turbulence during the evolution of moderate heat pulses in He II. W. Fiszdon, M. von Schwerdtner, G. Stamm and W. Poppe 663

Reviews

Fundamentals of Waves and Oscillations, by K. U. Ingard 685

Hydrodynamics of Coastal Zones, by S. R. Massel 686
